

COMPANY PROFILE

**BROUXMEN GLOBAL
SOLUTIONS PTE LTD**

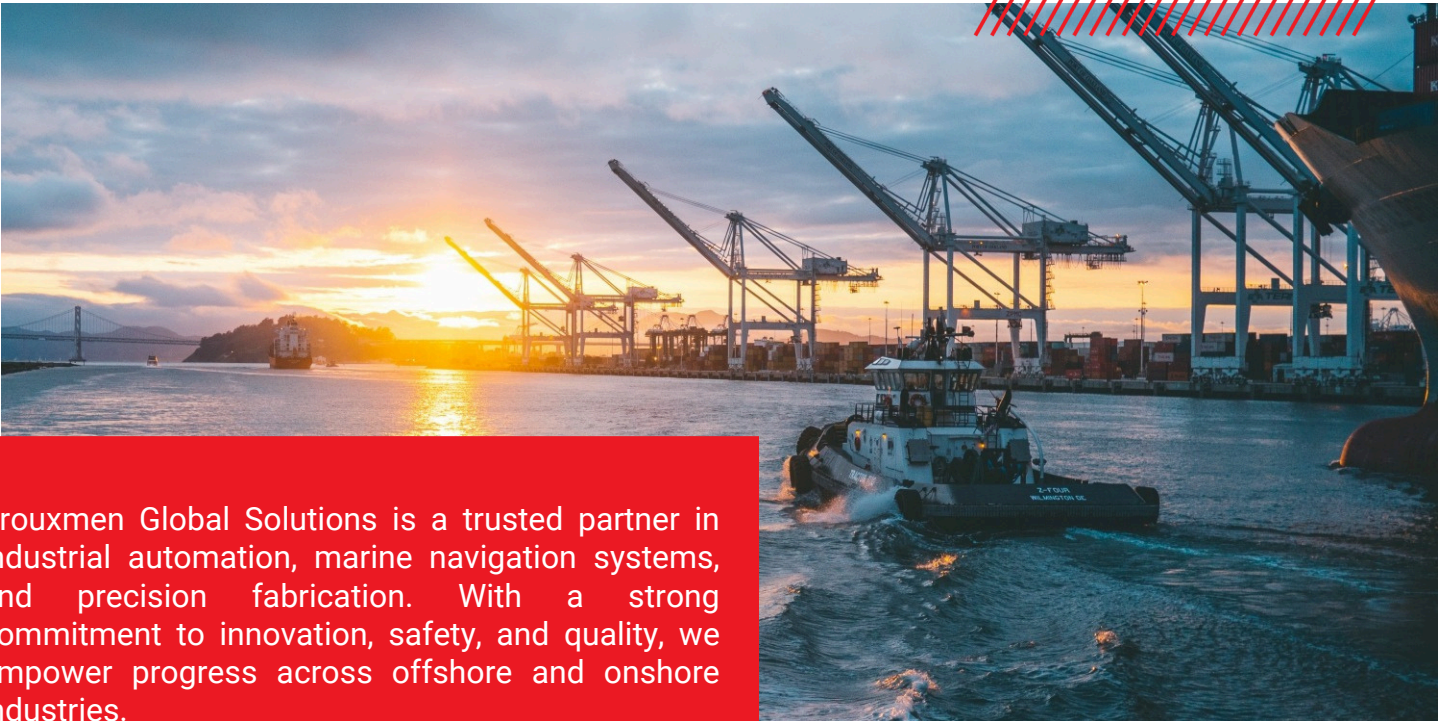

**Specialists in automation, NavCom, and industrial
fabrication for offshore and onshore projects**

With over 20 years of experience, we deliver intelligent engineering
solutions for the marine, energy, and infrastructure sectors.

About Us

Brouxmen Global Solutions is a dynamic, multidisciplinary engineering and services company headquartered in Singapore. We specialize in delivering cutting-edge automation, marine navigation and communication (NavCom) solutions, and high-precision fabrication services to a diverse clientele across offshore and onshore sectors.

With over two decades of experience, our leadership and technical teams have successfully executed complex projects across Southeast Asia and the Middle East. Our deep-rooted commitment to innovation, quality, and timely execution makes us a reliable partner for clients looking to modernize operations and optimize performance in demanding environments.

Brouxmen Global Solutions is a trusted partner in industrial automation, marine navigation systems, and precision fabrication. With a strong commitment to innovation, safety, and quality, we empower progress across offshore and onshore industries.

**Industrial And
Marine Automation**

**Navigation And
Communication
Systems (NavCom)**

**Onshore And
Offshore Fabrication**

The Vision

To become the preferred regional partner for intelligent engineering and technology-driven industrial solutions across the marine, oil & gas, energy, and infrastructure sectors.

Our Mission

- Delivering exceptional engineering and technical services with precision, integrity, and professionalism
- Empowering industrial and marine clients with future-ready automation and digitalization
- Sustaining a culture of safety, quality, and operational excellence
- Fostering long-term partnerships through transparency and innovation

Smart Engineering. Trusted Worldwide.

We've empowered offshore and industrial clients across Southeast Asia and the Middle East. Let's build the future together.

Why Choose Our Company?

- Over 20 years of hands-on experience across offshore and onshore industrial projects
- Professional engineers, technicians, and project managers with domain-specific capabilities
- Adherence to ISO standards, classification approvals, and HSE regulations to ensure safe, certified delivery
- Integration of Industry 4.0 practices, automation systems, and remote digital monitoring
- Based in Batam with direct access to Singapore and Southeast Asian markets for fast response
- Close collaboration with global OEMs, software providers, and marine innovators to ensure best-in-class solutions

Industrial & Marine Automation

At Brouxmen, we bring cutting-edge automation technologies to industrial and marine operations—optimizing performance, reducing downtime, and ensuring smarter, data-driven control.

Our Automation Capabilities:

PLC & SCADA Systems

Design and integration of systems using Siemens, Schneider, and more.

robust control
Allen-Bradley,

IIoT Integration

Sensor-based connectivity and data analytics to improve operational transparency and efficiency.

Vessel Automation & Control Panels

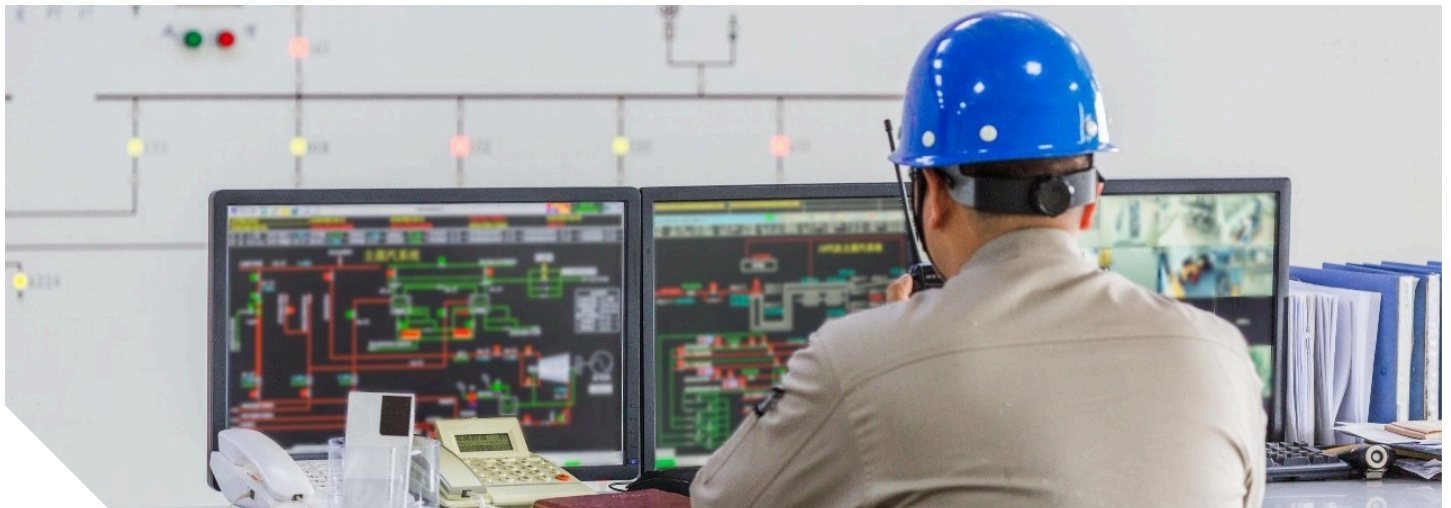

Automation systems for ship machinery and navigation, ensuring operational safety and precision.

Process Automation & Remote Monitoring

End-to-end process control with insights for onshore and real-time offshore environments.

AI-Based Predictive Maintenance

Smart systems that detect equipment anomalies early—reducing failures and maintenance costs.

NavCom Solutions

At Brouxmen, we bring cutting-edge automation technologies to industrial and marine operations –optimizing performance, reducing downtime, and ensuring smarter, data-driven control.

Our NavCom Capabilities:

GMDSS, Radar, AIS, GPS, ECDIS, VDR Installations

Installation and integration of certified systems for global safety, vessel tracking, and navigation

Compliance with IMO, SOLAS, Class Requirements

All installations are delivered in full accordance with international maritime regulations

Satellite Communication Setup

VSAT broadband, satellite phones, and digital connectivity for offshore and remote operations

Integrated Bridge Systems

Design of navigation control centers and bridge panels for centralized operation and monitoring

Radio Surveys & Annual Performance Testing (APT)

Class-approved inspections for communication systems, ensuring readiness and certification

Onshore & Offshore Fabrication

Brouxmen delivers precision-built fabrication for demanding industrial and marine applications—supporting offshore platforms, modular systems, and onshore infrastructure with tailored engineering solutions.

Our Fabrication Capabilities:

Custom Skid Packages, Panels & Frames

Engineered-to-spec modules for automation, control systems, and equipment housing

E&I (Electrical & Instrumentation) Fabrication

Integrated electrical setups with precise instrumentation for energy systems

CNC & Precision Cutting Services

High-accuracy cutting and profiling for steel, aluminum, and composite materials

Marine Platforms, Racks & Steel Structures

Fabrication of structural components with marine-grade integrity and durability

Modular Equipment Housing & Containers

Containerized units for offshore and remote operations, built to ISO dimensions

Industries We Serve

Brouxmen Global Solutions provides specialized engineering solutions for clients across a range of high-impact industries:

Marine & Shipping

Vessel automation, NavCom installation, bridge system integration

Oil & Gas (Upstream/Downstream)

Offshore fabrication, control rooms, SCADA systems

Petrochemical & Process Industries

Process automation and instrumentation integration

Energy & Utilities

IIoT systems, predictive maintenance, remote monitoring

Infrastructure & Construction

Modular fabrication, electrical panel integration, smart controls

Get In Touch

We're here to support your projects. Contact us for tailored industrial and marine engineering solutions.
